# Instructions

## Operation step and functions

- 1、 After connect the cylinder, need double confirm there is no leakage, then put the grease tray and cooking grill in the right place.
- 2、 First time use the appliance, should close the door without any food inside, use high fire to cook 5mins, for high temperature disinfection and smell remover.
- 3、 First time use the grease tray, also should use high fire to cook 1min for high temperature disinfection and smell remover.
- 4、 Cooking grill with tinfoil covering is used for cooking spare ribs, chicken wing, chicken, shrimp and vegetable etc.
- 5、 Upper burner is used for making soup, rice, noodles and boil water etc.

## Use tips

- \* As always use the appliance outdoor which need to remove the hose, there is lots of air inside the hose, it lower the ignition success rate. So suggest that pressing the valve of burner for 3~5 seconds to let air out.

## Lighting instruction:

- \* Open the glass door and remove the grease tray, push down the control knob for 3seconds, then turn it anticlockwise to the 90° position, when you saw it is lighting, still keep pushing the knob for 5seconds then leave it. If the burner has not lit, turn the knob 'OFF', and repeat the step above until it is lighting.
- \* If the burner has not lit after 3 attempts, wait 3 minutes and repeat the above steps.
- \* After the burner is lighting, you can adjust the flame by turning the control knob between high and low, this no need to push down the knob.
- \* After using the appliance, turn off the valve of the gas cylinder, then turn off all the control knob after the fire gone.

# Troubleshooting

- If you find any problem of the appliance, please send it to the servicing agent and inform the details and phenomenon.
- Please ask the dealer to complete the purchase date and make the shop's stamp. All guaranty matters are according to the words on the warranty.
- You have to pay the spare parts cost if the damage caused by improper operation or over 1 year from the date of purchasing.

**The below status might not be failure, please check it carefully before send the appliance to servicing agent:**

Exception	Cause analysis	Solution
Failure of ignition ①	The hose contain much air, or cold weather.	Light the upper burner first, then light the oven's, or use the ignition gun.
Failure of ignition ②	Use non-standard, adjustable regulator	Must use the fixed regulator with 28-30mbar
Failure of ignition ③	The gas is impure or with high impurity.	To judge the gas pure or not, you can see the fire. Fire in blue means pure, fire in red means impure.
Temperature rises slowly	Outdoor environment's humidity, temperature are not constant.	Warm up the oven to 200°C before put the food inside, also try to put the oven in a sheltered corner.

# Emergency treatment and product specification

## Emergency treatment
